UWAM01

 Unknown macro: 'gallery-scroller'

UWAM01 was the first vehicle designed & built by UWA Motorsport. It was the only entry from WA in the 2001 Formula SAE-Australasia competition, where the team finished 8th overall. The chassis has since been donated to the [REV project](#) where it has been converted into a [Self Driving Formula SAE Race Car](#).

Specifications	
Weight:	254 kg
Power:	60 hp
Engine:	Mid-mounted Honda Fireblade F4 600cc motorcycle engine, custom fuel injection, naturally aspirated.
Drivetrain:	Honda 6-speed sequential gearbox, Zexel Torsen limited slip differential.
Chassis	Tubular mild-steel spaceframe.
Suspension:	Fully adjustable double unequal length wishbones front and rear, pullrod-actuated Fox Racing springs and dampers, CNC machined aluminium uprights.
Brakes:	Two outboard front disc brakes with Formula Ford rotors and AP Racing callipers. Single inboard rear disc with Nissin calliper. Adjustable bias.
Wheels:	Keizer 3-piece aluminium wheels, 13x6 inch front and rear.
