

# Welcome to our new Sponsor, the RAC!

---

**For the better**

UWA Motorsport is proud to announce the beginning of a new partnership with the RAC through their [Community Sponsorships](#) program.

The RAC has been an integral part of the Western Australian community for more than 100 years and is committed to giving back to RAC members and the wider community. A key priority for the RAC is to help provide safer, sustainable and more convenient travel options for their members and the wider WA community.

The RAC's support is being directed towards the development of a more efficient engine and drivetrain package which will allow UWAM to continue to develop a more fuel efficient engine. This is beneficial for the teams out right performance, as over 10% of the competition points are awarded for fuel efficiency. It also falls in line with the RAC's goal to reduce CO<sup>2</sup> emissions for vehicles which is supported by the [RAC's Less Emissions Mission](#) program which offers discounts to people with economical cars as an added incentive for making the switch.

UWAM would like to welcome the RAC and is looking forward to developing a long and prosperous partnership.
